**REMINDERS:**

1. Iodine-131 must be stored for a minimum of 10 half-lives or 80 days. For planning purposes, use 3 months.
2. When estimating the activity, any reading near the right side of the scale X1 is 0,1 mCi. If on the lower side of the X1 scale, it is to be a fraction of 1 mCi, such as, 0.01 mCi.
3. When handling DIS materials, make sure you wear disposable gloves.
4. When placing decontamination agents, cleaners and wet rags into DIS, put a couple of cups of clean kitty litter in the bottom the bag before placing the items in the bag.
5. All DIS items are to be DOUBLY sealed.
6. A radiation symbol sticker is to be placed on the bag when placed into DIS
7. All radiation symbols are to be defaced or removed when removing bag from DIS for placing in trash.
